

Unity Day of Ukraine

February 16

A year has passed since President Volodymyr Zelensky signed a decree establishing February 16 as the Day of Unity of Ukraine. The Day was created with the aim of strengthening the consolidation of Ukrainian society, its stability in the conditions of hybrid threats' growth, information and propaganda, moral and psychological pressure on public consciousness.

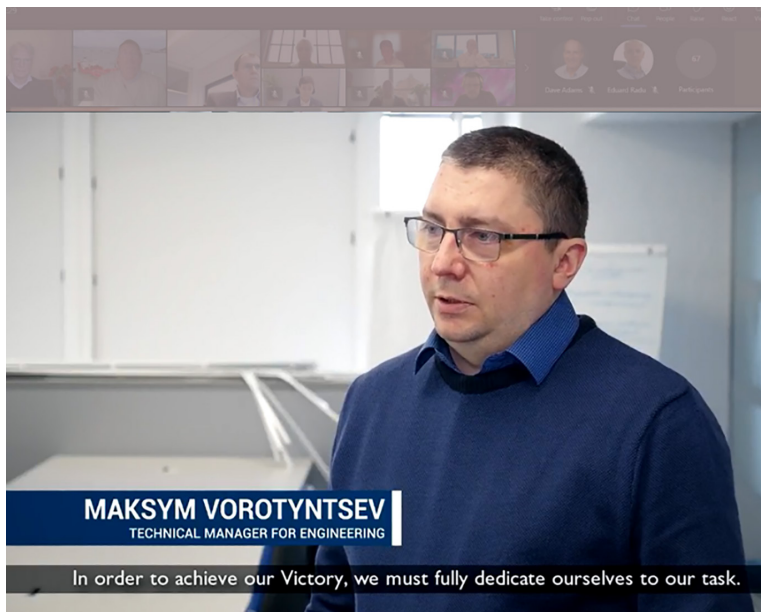

Today it is 357 day since threats turned into a bloody war that have been taking away thousands of defenders of Ukraine and the civilian population. So the day of unity turned into a year of unity, support, courage, fearlessness, and heroism.

One of the weapon types against the terror of the occupier today every Ukrainian is adept at are demonstrations through social networks of photos and video materials, telling the truth about the evil that the enemy has been doing with our cities, which Ukrainians have been suffering.

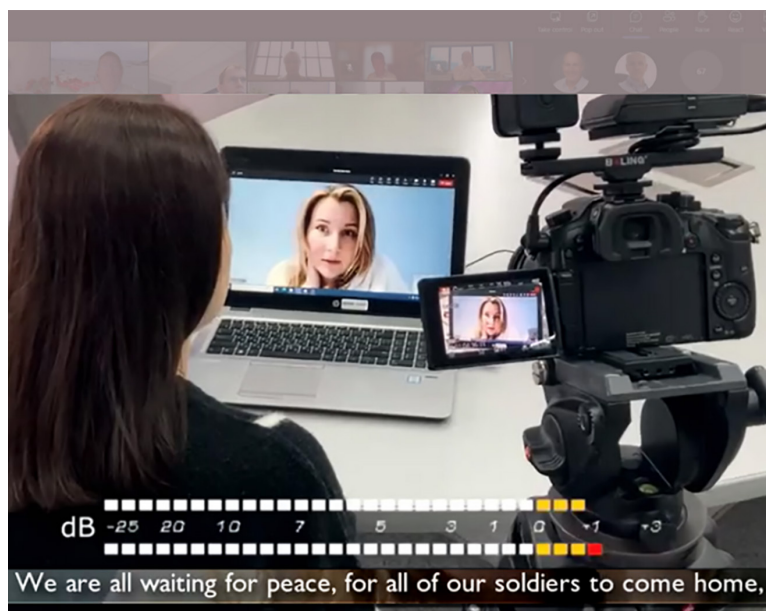

OLENA ZHUKOVA
DIRECTOR OF "MDEM" COMPANY

I dream that the world community will take an even more principled stand

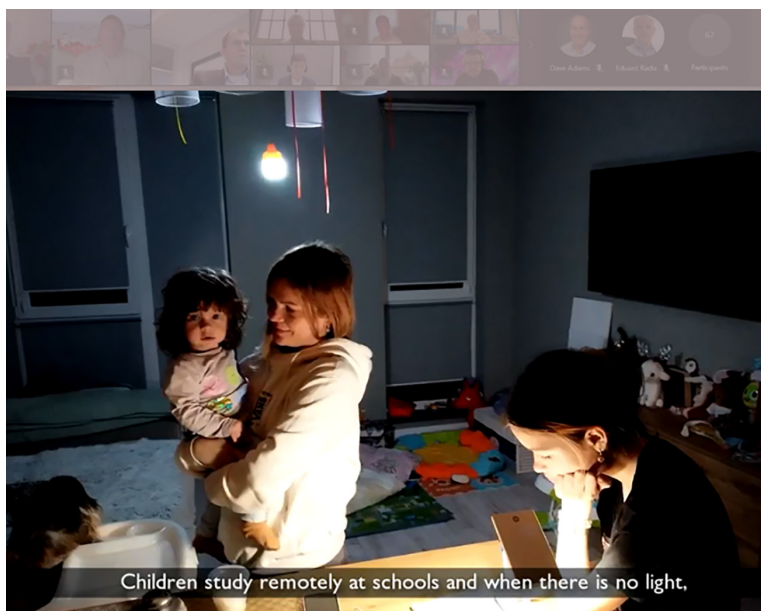

MAKSYM VOROTYNTSEV
TECHNICAL MANAGER FOR ENGINEERING

In order to achieve our Victory, we must fully dedicate ourselves to our task.

We are all waiting for peace, for all of our soldiers to come home,

Children study remotely at schools and when there is no light,

Today, during the Leadership event of Damen, which brings together representatives of all companies of the Group, MDEM Director Olena Zhukova had the opportunity to present a video about the modern realities of the life of Ukrainians, in particular MDEM employees to the European community. This material is about the war that befell Ukrainians, about the destruction of Mykolaiv due to hundreds of Russian missiles and its consequences, about lost homes of company's employees and the destroyed office, about horrors experienced in occupied Kherson through the eyes of colleagues and forced evacuation, about workers who defend the state at the cost of their health and life... about the energy terror of the rashists, about the company's support of employees and their families, about boundless hopes for the fastest possible and such a dream Victory.

Olena Zhukova noted that despite the external conditions, the company continues to work with Damen and has been in a privileged position, thanking the corporation for all-round powerful support and the opportunity to participate in international value added chains.

We symbolically raise the Flag in the name of unity, which can and will soon stop the aggression machine and total terror!

Glory to Ukraine! Glory to the Ukrainian Forces! **◀◀**
