

ALWARDY DAMEN DIVING SERVICES

DUBAI – SHARJAH – FUJAIRAH

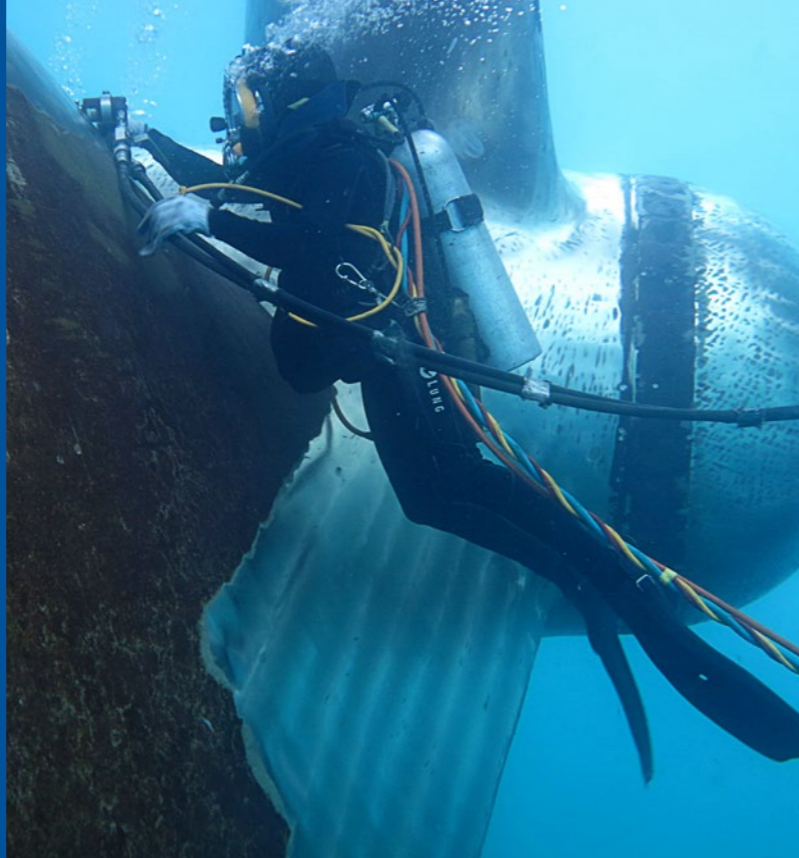

ALWARDY DAMEN

Albwardy Damen Diving Services has been serving the marine industry since 1995. Safety is our highest priority and we are accredited by Lloyds Register to the latest editions of ISO 9001, ISO 14001 and OHSAS 18001.

Our diving hub is located in Fujairah Port, from where our diving teams serve all UAE ports and anchorages. We also offer our full range of diving services in Sohar and Salalah, in the Sultanate of Oman. In addition to the UAE we also send teams to Africa and the Indian sub-continent.

Our teams provide marine, O&G and industrial assets with a wide range of underwater services. Underwater maintenance of marine assets is our main business, including hull cleaning, propeller polishing, underwater hull inspections and UWILDS, underwater blanking, wet and dry welding and seabed surveys. Anchor recovery is another specialty. We also operate two custom diving boats to support our underwater teams.

We are approved by the Port of Fujairah, DMCA, EHS Trakhees, Sharjah Ports Authority and ADPC to conduct commercial diving operations in all major ports and anchorages of the UAE.

UNDERWATER HULL CLEANING

We use advanced Brush-Kart systems fitted with specialist tried and tested hull cleaning brushes. Until recently, brushes were the only method capable of removing both marine slime and heavy fouling such as barnacles.

After extensive trials, our teams and equipment have also been approved by International Paints for the removal of marine growth on silicon-based coating systems.

PROPELLER POLISHING

Our teams have extensive experience in propeller polishing and provide full reports both before and after the polishing process. The final surface roughness is always rated Grade "A" on the Ruberts Comparator Scale.

BLANKING, PLUGGING AND COFFERDAM INSTALLATION

We are able to supply and fit blanks and plugs on vessels to allow for internal repairs ranging from valve replacement to pipeline overhauling.

CCTV CLASS INSPECTIONS

Albwardy Damen Diving Services is approved by all major Class Societies for carrying out IWS, UWILD and paint surveys on vessels and jack-up rigs. Our CCTV equipment represents the latest technology available in the current market. We currently hold approvals from ABS, BV, DNVGL, LR, NKK, RINA, and RMRS.

PROFESSIONAL AND CLEAR REPORTING

Measurements of hull and propeller performance are increasingly used as important fuel efficiency tools. We recognize the importance of data collection and monitoring by today's ship managers. Together with our clients we have developed a clear and concise reporting template for our inspections and services that can be tailored to your specific needs as required.

CERTIFICATES

We recognise that we work in a dynamic industry involving potentially hazardous equipment and operations. We are therefore committed to continuously maintaining a safe and healthy workplace and to improving our services wherever possible.

WELCOME

ALBWARDY DAMEN DIVING SERVICES

INDUSTRIAL AND PORT INFRASTRUCTURE SERVICES

- Pontoon and Jetty Inspections
- Installation of Sacrificial Anodes on Sheet Piles
- Underwater Welding
- Sea Bed Surveys
- Pipeline inspections and Cleaning
- Bellmouth and Screen Cleaning
- Navigation Buoy Installation/Relocation/Inspection

OIL AND GAS PRODUCTION FACILITIES

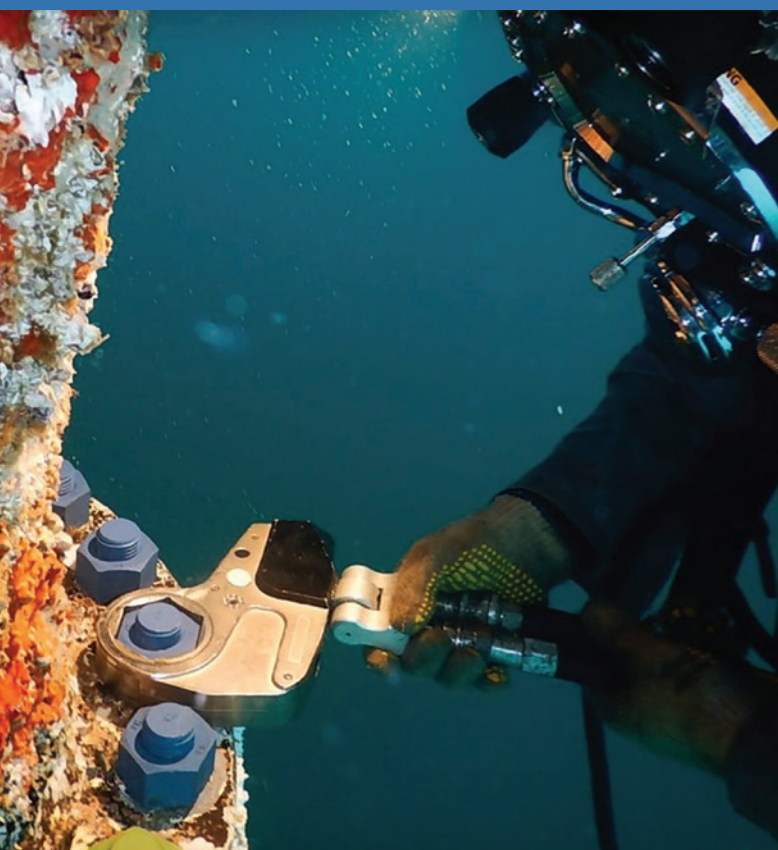

- CALM Buoy/SBM Maintenance/Inspection/Cleaning
- Subsea Hose Change Out
- Platform Inspection/Cleaning/Repairs
- Pipeline Inspections

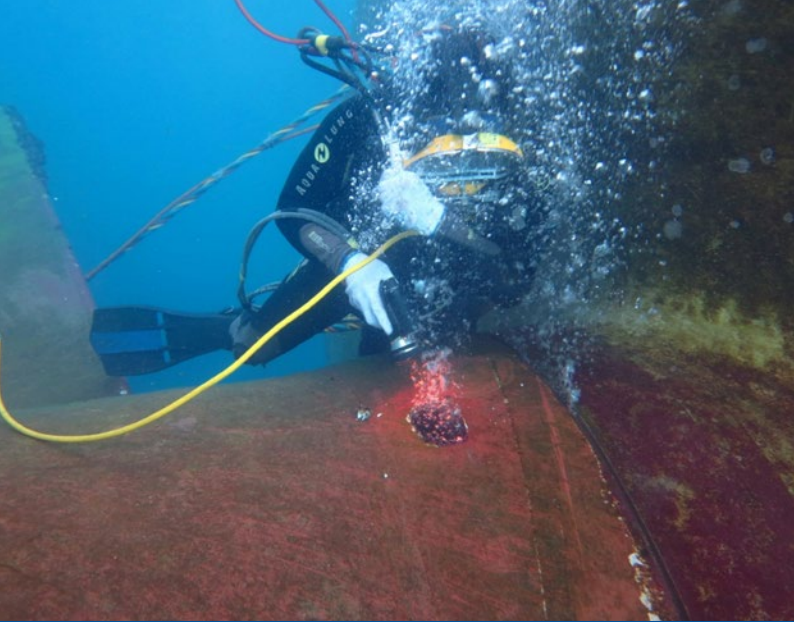

ANCHOR RECOVERIES

Anchor recovery is a specialty of Albwardy Damen Diving Services. We have successfully recovered anchors and chains from all the major UAE and Omani anchorages. With specialized mobile equipment and a range of suitable vessels we can deploy the optimum solution to match the anchor weight and local conditions. The largest anchor we have recovered to date was 26 tonnes and had a chain diameter of 125mm.

UNDERWATER WELDING

Our certified welders/divers conduct sacrificial anode installations and temporary and permanent repairs below the waterline on vessels and offshore structures.

ميناء صلالة
Port of Salalah

The Port of Salalah is the largest port in Oman. Situated in the Dhofar Governorate on the Arabian Sea, which lies in the north-western corner of the Indian Ocean, it is centrally located at the crossroads of trade between Asia and Europe. With easy access to over 2.5 billion consumers, the port serves the markets of East Africa, the Red Sea, the Indian sub-continent and the Arabian/Persian Gulf on its doorstep.

SOHAR Port and Freezone is a deep-sea port and free trade zone in the Sultanate of Oman, managed by Sohar Industrial Port Company (SIPC), a 50:50 joint venture between the Port of Rotterdam and the Sultanate of Oman.
