

MDEM - "Industry Leader 2023" according to the results of the National Business Rating

MDEM - "Industry Leader 2023 by the National Business Rating"

MDEM has been honored with the business award of "Industry Leader 2023" according to the results of the National Business Rating. Our company has held high positions in the rating for several years, and this is the second time we have been awarded since 2020. The leader status reflects the effectiveness of the company's work, its contribution to the development of the Ukrainian economy, and the improvement of the citizens' well-being in our country. The research was conducted by the National Business Rating in Ukraine.

Let us remind that at the end of 2023 MDEM workforce is around 200 employees. During 2023 our engineers were involved in a large variety of projects starting from hours and budget

estimation, design and proposal phase, and up to complete basic design, 3D model, and finally the release of production information. MDEM experts also submitted project documentation to various Classification societies, were busy with the yard support, and contributed to the very specific projects for towing, transportation, inspection, and other specific tasks on the request of the Clients and shipyards. The services portfolio has been expanded by engineering services of R&D department (strength analysis, vibration/acoustics), Electrical & Automation (including the Triton project), Standards & Documentation (including the Cadmatic library, Handbooks, Part Catalog, Service Part Catalog), as well as a wide range of services from the Digital Services Department.

We are grateful to MDEM team for the overall achievement! This honor is an eloquent indicator of dedicated work and a powerful motivation for future accomplishments! Furthermore, it is evidence that even in wartime, the company

did not curtail its business activity, but on the contrary actively continues its activities on the economic front of the country, having a strategic importance for the economy. ««
