

The Mykolayiv Polytechnic College

## Latest news from the south direction of Ukraine and MDEM office in Mykolayiv damage

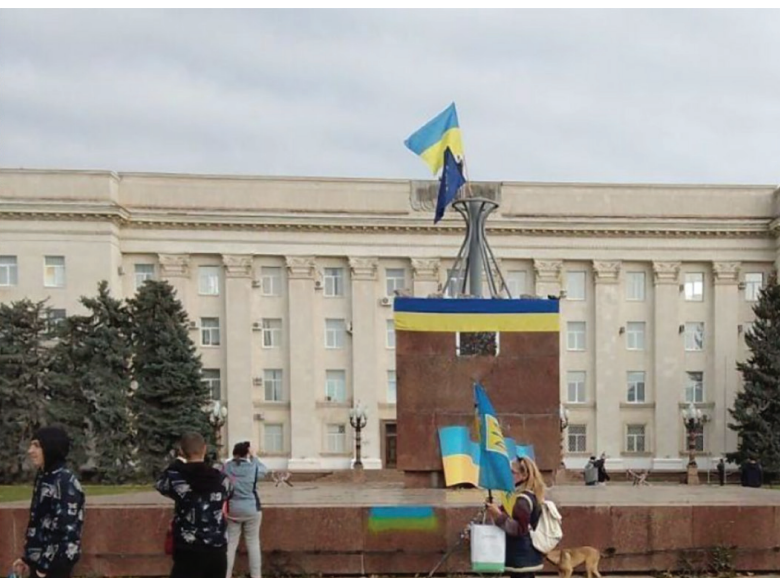

At night 31st – 1st of November as a result of rocket attack on [the Mykolayiv Polytechnic college](#) and neighboring houses MDEM office building in Mykolyaiv was damaged by blast.

Three rockets chased academic building of Polytechnical colleague (the flight of stairs has been completely destroyed) and two neighboring private houses. The college canteen and ground floor of the campus were heavily ruined by the fire. Fire and rescue units carried out rescue missions in timely manner and from under the rubble were deblocked two persons, importantly one woman died. Also the assistance was provided to twelve persons who were blocked in their apartments.

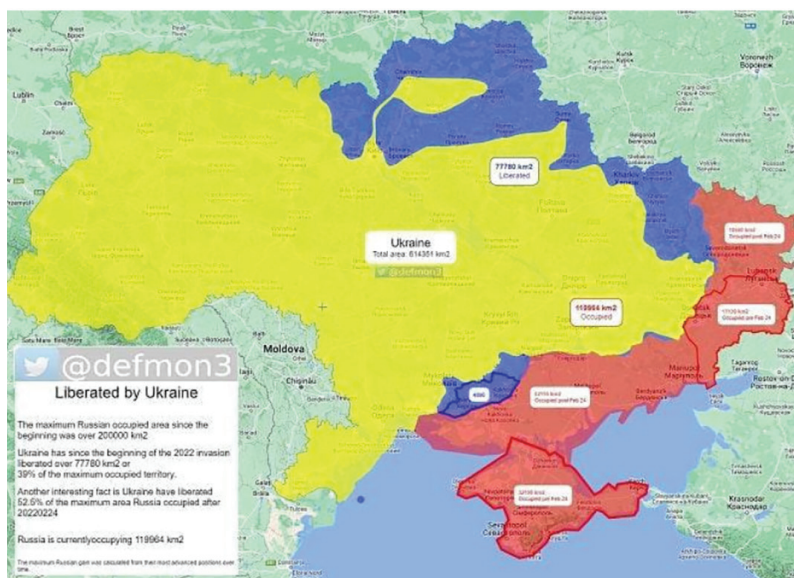

Neighboring multistoried buildings and MDEM office appeared in the range of the blast wave. On the second and the third floors of the office building the windows were broken from the side of explosions, besides there was internal damage, such as extruded internal doors, glass partitions, as well as damage to the ceiling. On the fourth, fifth, sixth floors some windows from the explosion side were also broken, the window frames damaged, - the destruction is more cosmetic, but requires the replacement of a significant part of the metal-plastic windows outside and inside the building doors to the rooms on the floors. Luckily no people were in the office building.

MDEM office in Mykolayiv damage

Kherson, Ukraine

Liberated territories of Ukraine

Notwithstanding heavy shelling Ukrainian spirit is strong and Ukrainian forces slowly but steadily push back the enemies troops. Ukrainian forces steadily advanced in Kherson Oblast on November 10 as Russian forces conduct a withdrawal to the east (left) bank of the Dnipro River, and on November 11, videos of Ukrainian defenders who began to enter Kherson have been already appeared on social networks - the Ukrainian flag has already been flying on the building of the Main Police Department. Finally, on November 15, Volodymyr Zelensky, the President of Ukraine, in his speech addressed to the G20 participants noted the following: "Kherson is one of the most important cities in the south of our country and the only regional center that Russia managed to capture after February 24. Today, Kherson is already free at last. It is like, for example, D-Day - the Normandy landings. It was not yet a point in the fight against evil, but it already determined the entire subsequent course of events. This is exactly what we are feeling now. Now, when Kherson is free." In addition, the logistics of the enemy on the left bank of the Dnieper are under fire control of the Armed Forces, so the occupiers are retreating deep.

The long-awaited positive news of the last few days was supplemented by ones from "Ukrzaliznytsia" on November 15, that it was restored passenger rail connections with Mykolayiv since the beginning of the full-scale invasion by launching the "Kyiv-Mykolayiv" train. Currently, according to analysts, Ukraine has already liberated 52.5% of the territory occupied by Russia since February 24. Almost 20% of the territory of our state is temporarily under the control of the occupiers. Nevertheless, taking into account the success in the Kherson direction, the administration of Mykolayiv urges not to return to the liberated cities until representatives of the Armed Forces report on the safety of such a step.

The Russian withdrawal will take some time to complete, and fighting will continue throughout Kherson oblast as Ukrainian troops advance and come up against pre-prepared Russian defensive lines, especially around Kherson City.

We strongly believe that Ukrainian victory is coming soon! Glory to Ukraine! Glory to its Heroes! 🇺🇦
